OUR POSITION

A supply partner, not simply a supplier — because the consumable in a clinician's hand has to perform the first time, and every time after that.

Truventus Medtech supplies the everyday consumables and devices that clinical teams depend on. Every line in our catalogue is selected against three tests — patient safety, measurement accuracy and dependable repeat performance — and priced so that institutions never have to trade specification for budget.

01 — WHO WE ARE

Excellence in MedTech

We provide advanced medical supplies that combine precision engineering, safety and performance — working alongside healthcare professionals to strengthen clinical efficiency and patient care across every care setting.

Our Vision

To become a trusted leader in medical supplies by consistently delivering high-quality, safe and innovative healthcare solutions that support better clinical outcomes and patient care.

Our Story

Truventus Medtech was founded to support healthcare professionals with reliable, high-quality medical supplies. Built on innovation, integrity and excellence, we focus on delivering safe and precise solutions.

Our portfolio spans injection and infusion consumables, diagnostic collection systems, personal protection and patient monitoring devices — supplied through routine procurement, bulk contracts and dealership partnerships.

Highest standards of quality & safety

We deliver medical products that meet rigorous quality standards — ensuring patient safety, accuracy and dependability in every use.

01

Patient Safety

Sterile presentation, secure sealing and safe-handling design on every patient-contact consumable.

02

Accuracy

Calibrated graduations, controlled flow and precise readings that clinical decisions can rest on.

03

Dependability

Consistent batch-to-batch performance, verified before despatch and supported afterwards.

04

Traceability

Batch identity maintained through the chain for straightforward institutional records.

05

Protective Packaging

Clearly labelled packaging that preserves sterility and integrity in storage and transit.

06

Responsive Supply

Planned replenishment and bulk fulfilment that keep critical items available when needed.

Comprehensive medical product portfolio

Nine core lines covering the daily consumable and device requirements of hospitals, clinics and diagnostic laboratories.

01

Syringes

Smooth, accurate injection with safe handling and reliable performance.

02

IV Cannulas

Safe intravenous access with minimal patient discomfort.

03

IV Drip Sets

Accurate fluid administration with reliable flow control.

04

Vacutainers

Precise-volume blood collection for accurate laboratory testing.

05

Gloves & Mouldings

Protective barrier products for examination and procedures.

06

Nebulizers

Fine, consistent aerosol delivery for comfortable respiratory therapy.

07

Digital Thermometers

Quick, clear temperature readings for everyday health checks.

08

Air Mattresses

Adjustable airflow support that helps prevent pressure injury.

09

BP Monitors

Fast, precise blood pressure readings with dependable accuracy.

Trunex — our house brand of syringes

Consistent tolerances across every presentation, for routine and high-volume clinical use.

Why healthcare teams choose Truvariantis

Six commitments that shape how we select, price and supply every product in the catalogue.

01

Innovative

Product selection is reviewed continuously, so newer designs in safety, comfort and ease of use reach your wards as they mature.

02

Accurate

Graduations, sensors and flow controls are checked against specification — clinical judgement depends on the number in front of you.

03

Reliable

Consistent performance from batch to batch: the same handling, the same result, order after order.

04

Responsive

Enquiries answered quickly and despatch planned around your consumption, reducing the risk of stock-outs.

05

Cost Effective

Competitive pricing structured for bulk and institutional purchasing, without lowering the specification.

06

Efficient

Simple ordering, clear documentation and sensible packaging that reduce the load on procurement teams.

Quality that delivers value

Healthcare procurement should never force a compromise between quality and affordability.

01 Reliable product performance

Consistent quality and dependable results in daily clinical use.

02 Cost-conscious procurement

Affordable pricing without compromising safety or specification.

03 Suited to routine and bulk use

Structured for high-volume institutional consumption across departments.

04 Built for operational efficiency

Streamlined ordering and handling that save clinical and administrative time.

05 Long-term institutional value

Durability and lasting cost efficiency across the contract period.

PRICING

Competitive, transparent, volume-aware

FULFILMENT

Routine, bulk and scheduled supply

PARTNERSHIP

Dealership and institutional contracts

09 — PARTNERSHIP

Let's build a stronger healthcare supply together

Whether you are looking for routine procurement support, bulk supply, dealership collaboration or product enquiries, Truvariant Medtech is ready to support your requirements with professionalism and reliability.
